

Band Saw, Metal, Horizontal

- Check horizontal bandsaw interior, clean if needed

Check horizontal bandsaw interior, clean if needed

Clean the Interior

1. Open the side panel.
2. Dredge out any buildup of chips, gunk, and other debris.
3. Ensure the cutting fluid can make its way to the sight glass on the bottom right of the machine. If it's not visible, submit a maintenance request so a trained person can mix and add coolant.
4. Ensure the drain for the drip tray is not obstructed
5. Ensure the drain inside the blade guard door (leads into a tube) are not obstructed
