Jointer Maintenance - Monthly

Task List

- Clean the machine with a shop vac and dry cloth.
- Wax the cast iron surface of the table
- Spray a light amount of teflon lubricant on the support pillars
- Check the motor drive belt for wear, splits and cuts. If the drive belt is in poor shape, submit a tool report.
- Clean any dust off the motor housing.
- Generally inspect the machine for damage and loose or worn parts. If any damage is found, submit a tool report.
