

Front Door August Lock Batteries

- Get 4 AA batteries
- Get a small flat blade screwdriver or knife
- The inside cover of the lock is removed by pressing the August Logo at the bottom and detaching the magnets.
- Remove the batteries, use a tool to help remove the rear batteries.
- Install new batteries (watch for green light when the last battery is installed. This indicates success.
- Reinstall cover, with the August symbol at the bottom.
- Test the lock function with your app.

There is no obvious low battery indicator, we are doing this on a 9 month cadence to be safe
